# **Atriis Travel Data Converter**

- Convert seamlessly your GTP GetTrip JSON file in a common GDS format
- Choose between the Basic Version or the Enhanced Version using full FareLogix XML Content to create your converted file
- No local installation required
- Flexible remark formats allow you to configure with us to be compliant with your TMC specific Mid-Office

### Basic or Enhanced Version?

TripID.

- Basic Version only uses the data from GetTrip
- Enhanced Version uses the rich data from the
  Lufthanse NDC content booked via Farelogix to
  create the GDS file and adds any additional
  GetTrip products you have from your GTP

# | The control of the

### Flexible Remarks

- Each TMC's mid-office uses different coding to insert additional information for either processing the invoice or for reporting purposes
- Client Remarks from the GTP TripID are added into your GDS File Format according to your specifications.
- Transfer your enhanced data for credit card companies such as Airplus to your mid-office
- Values from the TripID can be used to create variable text lines
- Add lines for instant invoicing or printing features your mid-office offers. Or prevent events from being triggerd.
- Format conversions not adaptations. Our application takes the values as they come from the booking sources. We do not adapt values.

# **Travel Data Converter Features**

Further use of your data with WDG plug-in features

- Agent Coupon Creator
- Flight Compensation

On request we customize our standard application towards your tailor made solution. This way nothing is left over to fully optimize all your TMC specific workflows.
