This can be your company

Flexible Remarks Formats

- Each TMC's Mid- & Back-Office uses different coding to insert additional information for either processing the invoice, the payment or for reporting purposes. We make sure you are able to comply with our rich set of formats

- Client Remarks from the Symphony BookingID are added into your GDS File Format according to your specifications.

- Transfer your enhanced data for credit card companies such as Airplus to your Mid- & Back-Office

- Values from the Symphony BookingID can be used to create variable text lines

- Add lines for instant invoicing or printing features your Mid- & Back-Office offers. Or prevent events from being triggerd.

- Format conversions not adaptations. Our application takes the values as they come from the booking sources. We do not adapt values.

- We convert seamlessly your Symphony Beast XML into a common GDS format (AIR, MIR & IUR). By offering this format any Mid- & Back-Office invoicing system able to integrating GDS formats makes you compliant with processing Symphony bookings. All Symphony booking channels are integrated: B2C, B2B and B2A

- We also offer to customize our standard application towards your tailor made solution or integration format .

- No local installation required (SaaS)

- "Flexible Remark Formats" allow us to configure for you to be compliant with your TMC specific Mid- & Back-Office Invoicing system additional input.

- We enable sending your data to multiple recipients, should you for instance require your data for invoices but also itinerary systems, duty of care, flight compensations, CO_2 compensation projects, …

- Off the shelf add-on plug ins to the Travel Data Converter are available with: Climate Neutral Group, FairPlane, …

- What we don't do? Is create any kind of GDS entries, this we leave up to Symphony.
